## OBJECTIVE

Versatile and growth-driven **Full Stack and Python Developer** with a strong foundation in building end-to-end web applications and intelligent systems expertized within Python, database management, and CI/CD. Passionate about crafting efficient, scalable solutions that merge intuitive user experiences with data-driven functionality. Recognized for quick adaptability, clean coding practices, and a commitment to continuous learning. Actively participated in various hackathons, showcasing problem-solving and teamwork skills

## EXPERIENCE

### • TechDevs

2025 Nov – 2026 Feb

*SDE-1 Intern | SEO, AWS, Next.js, Redux, Express, Rest API, Git & GitHub*

Remote

- Developed and maintained scalable, responsive user interfaces using Next.js and modern JavaScript (ES6+).
- Converted Figma/UI designs into pixel-perfect, reusable components with clean code practices.
- Integrated frontend components with REST APIs, handling data fetching, loading states, and error management.
- Optimized application performance, accessibility, and cross-browser compatibility.
- Collaborated with backend developers, designers, and product teams to deliver features on time.

### • Spotlyte

[View](#) | 2025 Jun – 2024 Nov

*Full Stack Developer (Solo) Intern | Fast API, React.js, Postgresql, Typescript, Redux.js,*

Hybrid

- Working as a solo full stack developer, responsible for end-to-end development of scalable web applications.
- Designed and developed RESTful APIs using FastAPI for efficient backend services and data handling.
- Built dynamic and responsive user interfaces using React.js and TypeScript.
- Managed global state efficiently using Redux for predictable application behavior.
- Designed and maintained PostgreSQL databases with optimized queries and schema design.
- Handled complete product lifecycle including development, testing, deployment, and feature enhancements.

### • Claidroid Technologies Pvt. Ltd

[View](#) | 2023 Dec – 2024 Jan

*Web Development Intern | HTML, CSS, JavaScript, PHP, MySQL*

Remote

- The system allows administrators to add, update, and delete student records. Admins can create and manage multiple courses and subjects dynamically.
- Faculty or administrators can enter marks for each student. The system calculates total marks, percentage, and grades automatically.

## PROJECTS

### • Orgpulse – CLI for GitHub Organization Insights Tool

[Docs](#) . [View](#)

**Tools:** [Nodejs, Commander.js, MongoDB, GitHub API, Axios]

- Developed a CLI tool to fetch and manage GitHub organization data, including repositories and issues, using the GitHub API.
- Integrated MongoDB for persistence, automatically storing and updating thousands of repositories/issues with upsert operations and checkpointing.
- Implemented custom CLI commands (fetch, export, sync-stars, top) to provide analytics like top repositories by stars/issues and export data to CSV.

### • Eventify – Event/Hackathons Management System

[View](#)

**Tools:** [Next.js, Typescript, Python, Fast API, Tailwind CSS, Razor pay, Jwt, GraphQL, PostgreSQL, Node Emailer]

- Built **Eventify**, a platform enabling organizers to create and manage events through a multi-step form with features like FAQs, image uploads, and scheduling.
- Enabled users to browse, book, and securely pay for events using Razorpay integration.
- Developed the application using Next.js, FastAPI, GraphQL, and PostgreSQL for efficient frontend-backend communication.
- Implemented structured data handling and real-time event management for seamless user experience.
- Designed a user-friendly interface with a secure and reliable payment workflow.

### • NoteMaker – AI-Powered Meeting Notes & Task Automation System

[View](#)

**Tools:** [N8n, Fathom API, Trello API, Google Gemini, Next.js, Tailwind CSS, Typescript]

- Automated meeting-to-task pipeline by generating Trello cards from AI-extracted action items.
- Reduced manual note-taking effort by converting transcripts into structured insights.
- Implemented scalable workflow architecture using event-driven automation (n8n).

### • WeChat - Real-Time Chat Application

[View](#)

**Tools:** [HTML, Tailwind CSS, WebSocket, JavaScript, Python, Flask]

- Developed a responsive user interface for all device sizes using the Bootstrap UI library.
- Built a real-time chat application enabling users to create chat rooms and share unique room codes for group communication.
- Implemented WebSocket-based communication to ensure seamless, low-latency messaging.
- Designed an intuitive interface to enhance user interaction and real-time collaboration.

### • Pallet Sensing Challenges

[View](#)

**Tools:** [K-Means, DBSCAN, Python, Folium, React.js]

- Pallet Sense is a leader in IoT-enabled smart pallet solutions, providing GPS-equipped pallets that transmit location, timestamp, and temperature data. Provide a Hotspot deviation zone using k-mean clustering for detecting nearby loss pallets.
- Create a dashboard for hotspot deviation zone and Live data for Pallet Lossing, Accuracy & Entropy in ReactJS.

## SKILLS

---

- **Programming Languages:** Python (Advance), Typescript and JavaScript (Moderate).
- **Backend:** Fast Api, Flask, Django, Node.js, GraphQL.
- **Frontend:** React.js, Redux.js, Next.js, Tailwind CSS.
- **AIML:** TensorFlow, OpenCV, Pandas, NumPy, Langchain, n8n, Seaborn.
- **Database Systems:** SQL (MySQL, Postgres), NoSQL (MongoDB).
- **Tools:** Docker, Git & GitHub, Package managers, Postman.
- **Soft Skills:** Communication. Networking, Problem Solving, Time Management.

## EDUCATION

---

- **K.J. Somaiya Institute of Technology**

*Bachelors of Technology Electronics and Telecommunication / Honors in Data Science*

◦ GPA: 8.34/10.00

*July 2022 - June 2026*

Mumbai, India

## ADDITIONAL INFORMATION

---

**Languages:** English, Hindi | **Interests:** Web Development, DSA, AIML, Object Oriented Programming.
